

FS303 Stainless Steel Saddles

Available in larger sizes with a small change to the product code

Ford Meter Box has expanded the FS303 Stainless Steel Saddle product line up to a 30" nominal pipe size range. To simplify identification, the prefix of the catalog number of two- and three-section saddles will now reflect the number of sections required to manufacture a particular size saddle.

Big or small, we've got your tapping jobs covered, so contact your local Ford Distributor or The Ford Meter Box Company and saddle up your pipe with Ford's FS303 Stainless Steel Saddles.
