

# No-Contact Coupling

(Patent Pending)

## Product Release

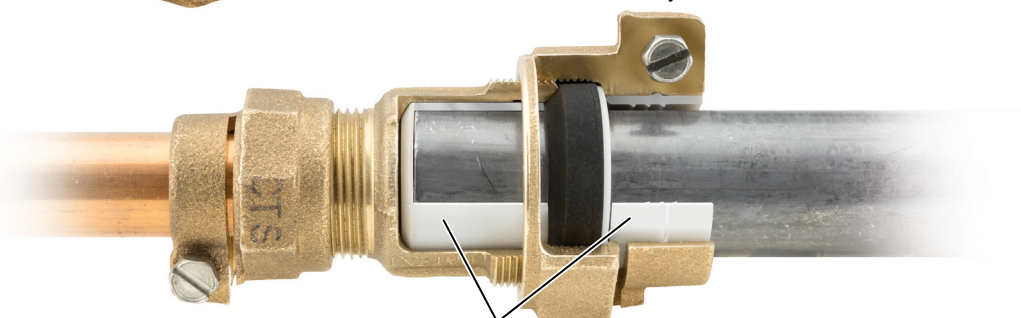

05/2017

Ideal for connecting existing lead plumbing lines to other service line materials, the No-Contact Lead-Pak Coupling prevents direct contact of the lead plumbing line with other metallic water system components. This design mitigates the possibility of galvanic corrosion.

No-Contact Lead-Pak compression couplings employ proven Pack-Joint performance and complement Ford's extensive line of waterworks coupling solutions.

Cut-away View

Permanently installed plastic gripper ring and sleeve liner prevent direct contact between lead pipe material and other metallic water system components
