Ford Meter Box BOALINQ™ Coupling

The BOALINQ™ two-bolt coupling can be used to join Steel, PVC, PVCO, Ductile Iron, Cast Iron, Asbestos Cement and HDPE pipe. The end rings and sleeve are made from lightweight carbon steel, providing strength while minimizing weight. The BOALINQ utilizes a concentric set of gaskets with a removable inner gasket that is replaceable to provide a greater range. Coated 316 stainless steel hardware is located on top of the coupling for easier and faster installation. The e-coat epoxy finish, combined with a fusion-bonded epoxy topcoat, significantly increases protection against impact, abrasion, and corrosion.
