Ford Meter Box No-Contact Coupling

Over fifty years ago, Ford shipped our first Lead-Pak coupling. This year, we have expanded that line to include the No-Contact Lead-Pak Coupling (patent pending). Ideal for connecting existing lead plumbing lines to other service line materials, the No-Contact Lead-Pak Coupling prevents direct contact of the lead plumbing line with other metallic water system components. This design mitigates the possibility of galvanic corrosion. For more information on this coupling or our other offerings for lead service line removal, visit www.fordmeterbox.com.
