Ford Meter Box Adjustable Height Pit Extension

If your meter pits are not level with the ground surface, Ford Meter Box has the solution. Ford's adjustable height pit extension is constructed of high strength HDPE and easily connects to the top of a buried 18" diameter coil or standard pit. With 12" of adjustability in four 3" increments, you can easily make sure your pit is at the proper elevation. Labels identify height and operational guides and the positive stop provides confidence of correct positioning. The adjustable height pit extension is also available to order on a new pit.

For more information on the adjustable height pit extension, contact Ford Meter Box® Customer Service at 260-563-3171 or online at www.fordmeterbox.com.
