Contact Person: Charlie Chapman

Looking for an easy way to convert a plain end pipe to a restrained flange connection? Look to the Ford Restrained Flange Adapter. Designed with the UFR1400 or UFR1500 restraints AND the SO-EZ gasket, these restrained adapters provide a *TRUE stab fit*. The restraint gland is furnished with actuating screws designed to twist off at the correct installation torque. The design and flexibility of the SO-EZ gasket maintains alignment of the pipe and coupling on various types of pipe having nominal pipe ODs. Features such as closed starter lugs, bolt-stops on the center sleeve, and the SO-EZ gasket make the restrained adapter easy to install with out disassembly. Available in sizes 3" through 12", these epoxy coated adapters are made with high quality ductile iron and corrosion resistant, high strength, low alloy steel rods and nuts. Ford's Restrained Flange Adapter is UL listed and FM Approved in sizes 4" through 12". For additional information on this or any other Ford product, contact your local Ford Distributor or The Ford Meter Box Company.
