### **Ford Meter Test Bench Recirculating System**

Ford Meter Box introduces the AMS Test Bench Recirculating System. Designed to reuse water through the use of a two tank system, the Ford Recirculating System seamlessly integrates to any Ford AMS Meter Test Bench.

Traditional water meter testing sends all the water down the drain after the tests are complete. Ford's recirculating system eliminates this lost water by constantly recycling test bench water. This system provides a constant and steady flow for accurate tests. For more information, check out our website at [www.fordmeterbox.com](http://www.fordmeterbox.com).
