Ford Meter Box Releases the Uni-Ring

The Uni-Ring consists of a restraint gland, restraint ring, optional spacer ring and gasket to easily connect mechanical joint fittings to plain end pipe. The Uni-Ring saves time by eliminating actuating screws. Available in sizes 4"-12" for ductile iron size and 2"-12" for steel size pipe, the Ford® Uni-Ring is suitable for virtually any pipe type. Adding the exclusive Ford spacer ring allows the Uni-Ring to be used on the most challenging pipe types, like thin wall PVC (DR25 or greater), HDPE and C909.
