Ford Blow-off Ball Valve

Ford's blow-off style ball valves are perfect for maintaining a healthy water main. Typically installed at the end of the pipeline, they can be used to flush sediment, relieve pressure, or vent excess air. With a vertical discharge outlet and 300 psi rating, this valve can accommodate a hose or diffuser to meet your need. Check out our website at www.fordmeterbox.com or visit us at the American Water Works ACE Convention at booth #1531.
