

# FORD® PLANT SOLUTIONS

## ISO 9001 Certification

This is to certify that DQS Inc. has registered The Ford Meter Box Company, Inc. to the International Organization for Standardization, ISO 9001-2015 Series Standards for quality.

Attention to quality is a tradition established by Edwin H. Ford at the founding of Ford Meter Box in 1898. Today, quality has become such an important issue to businesses worldwide that Ford Meter Box saw the need to embrace a quality system standard. ISO 9001 is a system that establishes a model for quality assurance in design/development, production, continual improvement and customer satisfaction.

Ford Meter Box has been certified to the ISO 9001 Standard since 1996, and has upgraded its certification to the ISO 9001-2015 Standard. The requirements specified in this standard are aimed primarily at preventing quality problems at all stages of the manufacturing process from design through delivery. The achievement of ISO 9001 registration represents several years of effort by all Ford Meter Box employees.

In a market economy, customers can choose to work with whatever company they feel can deliver the highest quality product. ISO 9001 registration confirms to all Ford customers that Ford Meter Box is serious about the quality of its products and that they will receive the best value for their money.
