

Stand Out with Stainless

Ford Meter Box offers a complete line of strong and durable 304 stainless steel waterworks products, but did you know type 316 stainless steel is also available? With an added corrosion-resistant factor and longer life span, 316 stainless steel is the perfect choice for severe environments. Just add “-Q” to the end of the part number.

Benefits of Type 316

- Capable of withstanding hydrogen sulfide in water applications
- Excellent ductility allows for sealing over pipe irregularities
- Higher resistance to pitting and crevice corrosion in chloride environments
- Fully passivated to restore natural, corrosion-resistant properties
