

FTSC Coating Change

Product Update

10/2017

Ford Meter Box has recently standardized epoxy coatings on ductile iron saddles and FTSC tapping sleeves. The traditional seafoam green epoxy has been retired for a black epoxy coating. This change will not affect the quality you have come to expect from Ford Meter Box. This will be a running change and some shipments may include a mix of the old coating and new. We will make every attempt to minimize mixed shipments. For more information, please contact Ford Meter Box Customer Service or your local Ford Distributor.
