

Curb Box Pentagon Key

Product Release

05/2012

Designed to simplify the opening and closing of a curb box, the Curb Box Pentagon Key offers deep five-sided flats to better engage new hex-bolt heads as well as worn heads. The key is made from cast steel (with a zinc plating to better resist corrosion) to withstand additional operator torque when using tools such as a shut-off rod.

- One end incorporates a narrow pointed end for dislodging dirt and debris from the bolt recess.
- Opposite end has a blunted radius that can be used to break ice or hardened debris.
- The width of the key across the flats is designed to accommodate a slotted tee-head key, so that a standard curb box shut-off rod can be used.

Part Number	Description
KEY-CB	Curb Box Pentagon Key

Note: The KEY-CB is compatible with curb box lid styles PS, PL, PXL and RL lids that are equipped with pentagon plugs P-PSL, P-PLL and P-PXL
