PTP-BR
Plug and Universal ERT Bracket

The Universal ERT bracket attaches through a meter box lid with an existing 1-27/32" or 2" AMR hole. The Universal Bracket accommodates most automated meter reading devices and positions the ERT at the top of the meter pit allowing for optimum radio transmission.

For lids with a thicker cross section, a longer threaded shank is available; PTP-BR-3-25.

PTP
Plug and Nut

For plugging an existing hole to keep debris from entering the pit, order the PTP (plug less the ERT bracket) or PTP-3-25 (plug with a longer shank).
