

Yokebox ERT Bracket

Product Release

05/2012

To accommodate the latest transmitter designs, Ford introduces our new ERT (Encoder-Receiver-Transmitter) bracket for the Yokebox. This under-lid ERT bracket is designed to not only secure the round “mushroom” style ERT’s, but also the new box-style, as well as other shaped transmitters.

Available as a stand alone product for field installations, or as a factory installed option, the bracket is available for both Ford’s Yokebox and Long Yokebox styles.

- Bracket accommodates the Aclara Star MTU, Metron-Farnier Transparent Technologies T2, Badger Galaxy TR3, and original mushroom style transmitters
- For field installation, the bracket includes three stainless steel clip rings for attachment to the existing posts on the underside of the lid
- When factory installed, the bracket is ultrasonically joined to the lid for a strong and durable joint

Catalog Number	Description
XXXXXX-LBR	LBR suffix is for a bracket factory-installed on the lid when ordering just a plastic lid
XXXXXX-PLB	PLB suffix is for a bracket factory-installed on the plastic lid when ordering a yokebox or long yokebox
PLBR-YL-LYL	Bracket only (for customer installation)

Note: Ford recommends verifying clearance from the bracket or transmission device to the meter (or other pit hardware) prior to ordering.
