

NEED A WIDE RANGE REPAIR CLAMP?

LOOK TO FORD FOR VARIETY, QUALITY AND AVAILABILITY

Today's buzz in repair clamps and couplings is "wide range." Ford's standard line of repair clamps offer operating ranges as great as 1.2"! The single band F1 and FS1 repair clamps have an operating range of .40" in sizes 4" through 12". Double section F2 and FS2 clamps have an operating range of .80". The ultimate range can be found in the triple section F3 and FS3, 1.20".

Ford Styles FS1, FS2 and FS3 All Stainless Steel Repair Clamps combine the corrosion-resistant characteristics of stainless steel and the sealing capabilities of rubber to provide a strong, dependable and versatile repair clamp.

The All Stainless design is lightweight and easy to handle under adverse conditions

The Ford FS2 Repair Clamp with an operating range of .80"

associated with almost every main break. The fixed bolt position provides uniform bolt control and fewer parts to

fall into the trench. The sliding lifter bar is retained on the bolts by the heavy hex nuts and facilitates the installation by serving as a handle to hold while installing the clamp.

Ford Styles F1, F2 and F3 Repair Clamps provide a simple and economical method of repairing holes

or breaks in water mains, particularly where corrosion is not a factor.

Ford clamps offer heavy-duty lug

construction for maximum strength and a drop-in bolt design that does not require bolt removal when installing the clamp. There are never any loose parts to lose in the ditch. Ford Repair Clamps come in a wide variety of styles and cover a wide range of pipe diameters.

For more information on how Ford can meet your wide range needs, call your local Ford distributor or contact The Ford Meter Box Company.
