

## Flip your lid and replace it with Ford's new Plastic lid.

Ford Meter Box can now provide you with an 11-1/2" round plastic overlapping lid. Ford's lightweight plastic lid, CX3LP or CX3LP-BR (with ERT bracket) can be retrofitted to any of Ford's type "C" or "X" covers having an 11-1/2" iron lid.

Utilities with an Automatic Meter Reading (AMR) system will save time, money and labor with this high strength polypropylene lid. When ordered with the optional Encoder-Receiver-Transmitter (ERT) bracket, meter readers will no longer have to remove the lid to obtain meter readings; the ERT's signal easily transfers through the lid.

A locking lid is standard to prevent tampering and incidental removal by lawn equipment or snow removal equipment. This durable Plastic lid is UV resistant, impact resistant and is excellent for lawn applications. Plastic lids are recommended by ERT manufacturers.

Ford currently offers plastic lids for yoke boxes, long yoke boxes and jumbo yoke boxes as well as the CX3LP style lid and continues to expand on plastic lid products. Contact The Ford Meter Box Company or your local Ford Distributor to find out how you can acquire Ford's Plastic Lids or other quality Ford Products.
