

# The Meter Setter

## IS YOUR FORD CATALOG *UP TO DATE?*

The Ford Meter Box Company offers one of the most complete lines of water works brass valves and fittings, water meter setting equipment, pipe products, and pipe line restraint products in the industry.

Providing detailed information for our line of products, the Ford catalog has continued to grow and evolve. Consisting of 19 separate sections, the comprehensive Ford catalog is a continual work in progress as new products are added or existing products updated. Although we continue to update, print, and distribute the separate sections of our catalog, the web version of each section is always the most up to date. Maintaining the electronic library allows us to provide information 24 hours a day while furthering our efforts to be environmentally conscious and assuring that current product information is always available.

To request a catalog section, contact your local Ford distributor or The Ford Meter Box Advertising Department. For the most up-to-date copies, please visit [www.fordmeterbox.com](http://www.fordmeterbox.com).
