

## FORD ULTRA-FLEX COUPLINGS GO TO GREAT LENGTHS TO CLOSE THE GAP!

When Ford introduced the Ultra-Flex wide range coupling, it hit the ground running. The following benefits have made the Ultra-Flex coupling an increasingly popular solution to common coupling problems:

- *The widest, useful range in the industry*
- *Standard fusion bonded epoxy coating*
- *Buna-N gaskets*
- *Easy installation*
- *Outstanding performance*

The Ultra-Flex has established a strong track record in less than two years and has become one of the most popular coupling designs. Quality materials and exceptional design have kept sales at a winning pace.

Although it was not easy to improve the best wide range coupling in the industry, we did! We have literally extended this coupling line to greater lengths. Ultra-Flex couplings are now

available with 12" sleeves for an extra long measure of versatility.

Make sure you don't come up short - use Ultra-Flex wide range couplings. Whether you choose our standard length or 12" long sleeves, Ford Ultra-Flex couplings will close the gap. For more information about Ford's Ultra-Flex wide range coupling, contact your local Ford distributor or The Ford Meter Box Company, Inc.
