

FORD DUAL-ARMOR WRAP CLAMP

Expanding our line of stainless steel repair products, Ford Meter Box introduces the NSF61 approved FSC-R2 Dual-Armor Wrap Clamp.

Adding to the original FSC-R wrap clamp family, the dual-armor clamp offers full wrap-around coverage of two stainless steel armors to provide maximum leak protection. The dual-armored EPDM gasket includes an integrated cut-back relief line for easy opening of the gasket and provides 360-degree coverage of the pipe, making it simple to squeeze and hold over the leak. The stainless steel body and E-Coated ductile iron lugs provide superior corrosion resistance, while gasket location indicators simplify “blind” installation for underwater conditions. A Buna-N gasket is also available.

Designed with type 304 stainless steel, Armorguard E-Coated lugs and an EPDM gasket, the best come together to offer a superior quality clamp with maximum coverage and reliable performance.

For all your repair needs, choose superior leak protection with Ford repair clamps. For additional information, contact your local Ford distributor or visit us online at www.fordmeterbox.com.
