

FORD METER BOX LISTENS!

Field Feedback Fuels Features

In September 2016, The Ford Emergency Repair Clamp Kit was introduced and quickly embraced by water purveyors as “*the*” solution for emergencies with unknown pipe diameters. Covering pipe diameters between 4.50" and 33.74" (O.D.), the repair clamp kit prepares any water utility for an emergency situation, regardless of pipe size.

Responding to customer suggestions, several features and options have been added to the repair clamp kit, including an expanded length kit of 15 inches, tapped panels, 316 stainless steel hardware and an HDPE kit.

- **15" Kit** – For increased pipe coverage, order the FSERK-L15 for 15" long clamps instead of the standard 12.5" long clamps.

- **Tapped Panels** – The tapped outlet is 18-8 Type 304 stainless steel and is fused to the clamp band by a fully passivated TIG weld. To order, add the tap code from the table to the required stainless steel band.

Tapping Codes

CC (AWWA) THREAD		IP THREAD	
SIZE	CODE NUMBER	SIZE	CODE NUMBER
3/4"	CC3	3/4"	IP3
1"	CC4	1"	IP4
1-1/4"	*CC5	1-1/4"	*IP5
1-1/2"	CC6	1-1/2"	IP6
2"	CC7	2"	IP7

* Contact factory for availability

- **316 Stainless Steel Hardware** – To order, add “-Q” to FSERK.
- **HDPE Kit** – This kit contains Belleville/Spring washers for use with HDPE pipe. To order, ask for FSERK-HDPE-KIT.
