

CELEBRATING A DECADE OF FORD QUICK JOINTS!

In 1997, Ford Meter Box introduced the Quick Joint and heralded it as “The One Step Coupling Made With The Ford Tradition Of Quality.” Within a decade, the Ford Quick Joint established itself as an extremely reliable and highly durable compression connection throughout the country.

Today the Quick Joint is available on a wide variety of Ford products. It truly is a one-step connection. Just stab the copper or plastic tubing into the fitting and tighten down the compression nut to the external stop. That's it!

The Ford Quick Joint provides excellent pullout resistance and superior hydraulic blow-off protection. Use Ford Quick Joint products and enjoy the benefits experienced by thousands of engineers, utilities and contractors throughout the country.

For more information about Ford Quick Joints and our entire family of compression fittings, including the Pack Joint and the Grip Joint, contact your local Ford distributor or The Ford Meter Box Company.
