

# The Meter Setter

## Catalog Updates for Couplings and Specialty Products

As our product offerings expand, we have reorganized two catalog sections to better reflect our full range of solutions. With the addition of the BOALINQ™ Two-Bolt Coupling, our growing line of stainless-steel pipe products, and our recent acquisition of Baker Coupling, our traditional catalogs need to evolve with the times.

### To improve organization:

- Catalog Section M is now dedicated to couplings and includes all standard pipe couplings regardless of material.
- Catalog Section N now focuses on engineered pipe products and fittings, showcasing our more specialized solutions.
- Baker Coupling products have been integrated into both sections accordingly.

The recategorized groupings are now reflected in our price book, website, and distributor portal to ensure consistency across all resources.
