A NEW TRAINING CENTER FOR EDUCATING FORD METER BOX CUSTOMERS AND DISTRIBUTORS

The Ford Meter Box Company is happy to announce the opening of a new training center. Located at the Ford Meter Box corporate office in Wabash, Indiana, the training center provides a comfortable setting and is equipped with the latest in presentation equipment.

Bill Cranford, Ford Meter Box District Manager, leads a discussion about Ford pipe products.

For decades, Ford factory tours have been very popular. Thousands of Ford customers and distributors have journeyed to Wabash to visit the factory and see the Ford manufacturing process.

American business is embracing continuing its education to improve employees, and the Ford Training Center is a response to that growing need. Training sessions are also very effective in developing a better understanding of the application of materials used in our industry.

Today, Ford Meter Box offers factory training on water works brass valves and fittings, meter setting equipment, meter testing equipment, pipe products

and Uni-Flange pipe restraints. All Ford training sessions are conducted by factory trained personnel and include a tour of the Wabash manufacturing facility.

For more information about utilizing the Ford Training Center, contact your local Ford distributor or call The Ford Meter Box Company.

Lynn Landis, Quality Assurance Supervisor, pressure tests Compression fittings during a "hands on" session in the Engineering Lab.
