The Meter Setter

Stainless Steel Solutions for Pipe Products

In demanding environments with high pH soils or exposure to aggressive chemicals, the need for products with robust corrosion resistance cannot be overstated. Recognizing this, Ford Meter Box has introduced a line of solutions specifically engineered to address these challenges.

Ford now offers Type 304 or 316 all-stainless steel couplings and restraints designed to withstand many extreme conditions. These materials ensure that customers have access to high-quality components for piping systems that meet performance and durability requirements in harsh environments.

With Ford's innovative offerings, system engineers can now navigate corrosive applications with confidence, knowing they have a partner dedicated to delivering quality stainless steel pipe products.

- 100% domestic fittings available
- Stainless steel for enhanced durability
- Ideal for eliminating fittings of dissimilar metals in stainless steel piping systems
- Traditional design for ease of installation
- Customizable sizing available for unique applications
