

FABRICATED STEEL PRODUCTS

The Ford Meter Box Company has expanded its fabricated steel capability many times in recent years. Today, Ford can meet your fabricated steel requirements with a large variety of state of the art fabrication equipment. Ford's fabricated steel product line consists of the following:

FC3 Steel Coupling

- Steel Center Sleeve and End Rings
- Standard Gasket Specially Compounded for Water or Natural Gas Applications
- Nominal Sizes 1/2" through 12"

FC23/FC24 Steel Transition Coupling

- Steel Center Sleeve
- Ductile Iron End Rings
- Rated Working Pressure - 200 PSI
- Nominal Sizes 4" through 12"

FC4 Steel Coupling

- Carbon Steel Center Sleeve
- Carbon Steel End Rings
- Large Variety of Gasket, Hardware and Coating Options
- Nominal Sizes 14" through 60"

FC5 Steel Transition Coupling

- Steel Center Sleeve and End Rings
- Maximum Transition Between Pipes is 1"
- Nominal Sizes 14" through 60"

FC6 Steel Reducing Coupling

- Steel Center Sleeve and End Rings
- Connects Pipes With Diameter Variations in Excess of 1"
- 150 PSI R.W.P. with Reduction of two Nominal Sizes or less. Greater reductions are available.
- Nominal Sizes 4" through 60"
