Prepare for Pipe Bursts This Winter with Ford® Repair Clamps

Don't get caught in the cold this winter with a burst pipe or water main! Freezing and thawing temperatures can be detrimental to waterlines this time of year, so prepare for the unexpected by stocking Ford repair clamps. Available in a wide variety of styles and sizes, Ford has inventory on hand to service your needs.

Improving the FS Style Repair Clamp

In 2014, after 40 years of providing reliable repair clamps, Ford redesigned the FS Style Repair Clamp with the intention of simplifying installation. By softening edges, tapering the lug profile, and increasing the bolt hole diameter on the lifter bar, the clamp eases into position effectively and efficiently.

Emergency Repair Clamp Kit

For the unexpected times when pipe leaks occur and the pipe diameter is unknown, Ford offers the Emergency Repair Clamp Kit, where multiple sections easily join together to cover a wide range of pipe diameters. For more information on Ford pipe repair products, refer to Catalog Section L on our website at www.fordmeterbox.com, contact Ford Meter Box, or call your local Ford Meter Box distributor.
