

Ford Offers Line of Non-Potable Water Products

For over 100 years, Ford Meter Box has been manufacturing high quality products for use in water systems. Now Ford is expanding its focus and developing a larger line of solutions for non-potable applications. If you need to connect or restrain sewer pipe, please contact your local Ford distributor or visit us at www.fordmeterbox.com.

Ford Sewer Saddles are available in a wide range of connection and pipe sizes. With a 304 stainless steel band that adjusts to fit an array of pipe sizes and a Buna-N gasket to ensure a secure seal, the Ford Sewer Saddle is ideal for non-potable water applications. A quick and simple installation will ensure a secure connection with up to 7 psi working pressure in no time.

For keeping pipe secure, Ford offers a sewer pipe restraint rated for 50 psi. Specially designed for ASTM 3034 type PSM sewer pipe, the optimized clamping bolt and tie rod location minimizes pipe wall stress. Simply assemble the restraint onto the bell and spigot connection and tighten the bolts to 100 ft-lb.
