

FORD CAN HANDLE THE PRESSURE

Ford Ball Valves and Ballcorp™ Corporation Stops are designed to handle the higher pressures every water superintendent is facing now and in the future. Not only pressures to meet the challenges of customer demand and regulatory standards, but high water pressures to extend water services to

outlying areas in the distribution system. Let Ford Ball Valves handle the pressure so you can give more time to easing the other demands of your job. For details on higher pressure water works valves and fittings, contact your nearest Ford distributor or the Ford Meter Box Company.
