

## FORD METER SETTINGS CAN SOLVE YOUR SPECIAL NEED

The Ford Meter Box Company has long been known for its innovative design of meter setting devices and other service and repair items. Ford's vast resources of experience, personnel and material enable us to design and produce some of the most creative and reliable setting devices in the industry today.

This sub-metering manifold setting installed in New Boston, Michigan greatly reduced the space normally required for an apartment complex.

At Ford Meter Box, we welcome the opportunity to design a meter setting to address your special requirement. Unlike manufacturers that offer a limited number of products, Ford offers the

This triple pit setter was designed for North Wales, Pennsylvania. The setter incorporates a pressure regulator, dual check valve and 1-1/2" meter.

widest variety of products and is willing to develop new items to satisfy your unique need. Instead of looking for inventory reductions and consolidations, Ford Meter Box remains committed to making what is needed and making sure it can be delivered on time.

For more information about Ford's ability to meet your special meter setting requirements, contact your local Ford Meter Box distributor or call The Ford Meter Box Company.
