

## Thirty Years of Products for Electronic Meter Reading Accessibility

In 1987, Ford Meter Box released its first lids for use with Automatic Meter Reading (AMR) technology. Since then, our offerings for accommodating ERT devices have expanded and include the following options:

**2005** – The W3BPD recessed inner plastic lid for ERT clearance becomes standard for Wabash covers ordered with e-read option.

**1987** – Ford offers modified lids with pre-cast holes for the TouchRead™ module assembly.

**2009** – The PTP-BR is released for plugging an existing AMR hole in a lid while positioning a transponder for clear signal reading.

**2007** - Plastic yokebox, long yokebox and jumbo lids are released and include an optional bracket for mounting ERT units

**2009** – Ford introduces a new lightweight plastic lid, CX3LP or CX3LP-BR (with ERT bracket).

**2015** – Ford released a plastic lid with an H-20 traffic rating. The PPSC series accommodates the need for reading AMR signals easily in high traffic areas.

As AMR technology evolves, Ford Meter Box stands ready to provide solutions to meet your needs. Contact Ford Meter Box or your local Ford distributor for more information.
