

## The Ford® Uni-Ring

### Ford Meter Box Releases a Mechanical Joint Ring Restraint

Need a mechanical restraint that works on C900, Ductile Iron, HDPE **AND** C909?

Ford Meter Box has released the Uni-Ring, a mechanical joint ring restraint that can be used on many pipe types.

Installing the Uni-Ring is simple. The Uni-Ring saves time by eliminating actuating screws and requires no more effort than installing an MJ gland! Assemble the restraint gland, restraint ring, spacer ring and gasket onto the pipe, then tighten the T-head bolts into the mechanical joint fitting.

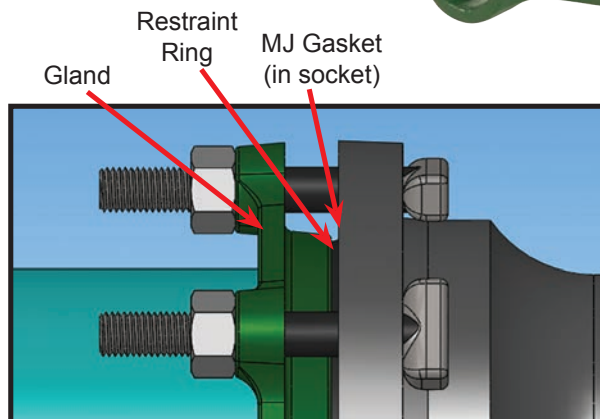

Available in sizes 4" - 12", the Ford Uni-Ring is suitable for ductile iron pipe and C900 PVC. The addition of the exclusive Ford spacer ring allows the Uni-Ring to be used on the most challenging pipe types, like thin-walled PVC pipe (DR25 or greater), HDPE and C909 PVCO.

For more information, contact your Ford Meter Box customer service representative.

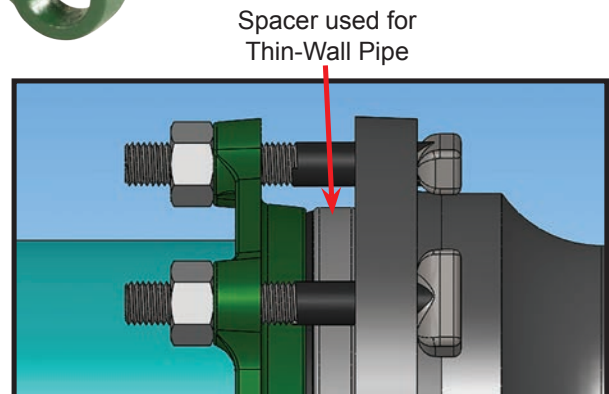

#### Designed for:

- C900
- Ductile Iron
- C909
- HDPE (when used with insert stiffener)
