## Save with Ford's Recirculating System

Ford Meter Box introduces the AMS Test Bench Recirculating System. Designed to reuse water through the use of a two tank system, the Ford Recirculating System seamlessly integrates to any Ford AMS Test Bench.

Traditional water meter testing sends all the water down the drain after the tests are run. Ford's recirculating system eliminates this lost water by constantly recycling test bench water. The two tank system provides a constant and steady flow for accurate tests.

**Note:** Ford AMS System required.

For more information about the Ford Recirculating System, contact The Ford Meter Box Company or your local Ford distributor.
