## FORD® S STYLE BRASS SADDLES

This is to certify that brass saddles, as manufactured by The Ford Meter Box Company, Inc., in Wabash, IN, meet all applicable standards of ASTM (Specification B62 and/or ASTM B584, UNS/CDA No. C83600) and the American Water Works Association, including AWWA Standard C800 and latest revisions. These brass saddles shall be manufactured from a brass alloy with a metal content consisting of 85% copper and 5% each of tin, lead and zinc (85-5-5-5 spec.). Brass saddles (in most states) are not required to comply with the no-lead requirements stated in the United States Public Law 111-380. S Style brass saddles are certified to NSF/ANSI 61.

Ford S Style brass saddles are suitable for above ground and below ground use and if properly installed and maintained under normal service conditions, will effectively seal at the pressure ratings listed below, providing the pipe O.D. remains constant and the appurtenances are properly stabilized. Contact Ford Meter Box if higher pressures are required.
